## HOW TO ADOPT R FOR USE IN CLINICAL SUBMISSIONS

Industry representatives from Janssen, Roche, Bayer and other leading pharmaceutical organisations share their experiences

Start with a narrow focus and set realistic targets from day one

1

Define your package control early – it's complicated

2

Connect to the wealth of community practice in R to drive change

3

Use the knowledge sources available to you to build a sustainable system

4

QA and IT teams are right with you, ready to talk and share. Reach out to them

5

Define what the governance process looks like for your organisation

6

Do lots of exploratory work and set up an agile infrastructure

7
